Frontend engineer

Programming stacks; NextJS

Hello! I am a Front-end engineer with some knowledge on back-end and web development. Innovative, creative and experimenting on new ideas developed or improved personally or with a team. Excellent presentation and communication skills underpinned by an enthusiastic and proactive approach.

Technical skills, tools & specializations

Next JS, Typescript, Git, Postgres, Tailwind, Graphic design and camera control.

Professional Experience

Freelancer (May/2020 - Present)   **Fiverr.com**

I design and create prototype websites and graphic design on the freelancer site. I also do photography and videography on the side.

    Skills; Tailwind, Figma, Photoshop, Adobe Illustrator

Team Member (May/2021 – June/2022)   **KFC Eldoret**

I joined KFK(Kuku Foods Kenya) in 2021 due to monetary reasons. I later left to pursue my passion which is programming and photography..

Accomplishments:

- Team member representative for Kenya west KFC shops.
- Head chef

Salesman (2018 - Sep/2019)   **Klout.shop**

I did this job as I studied in Moringa. I got to learn how to communicate to people and how to deliver good customer service.

Accomplishments:

- Increased sales by looking for hotspots where my product would be marketable.

Education

Certificate in Software Engineering, Moringa school *(April 2019 - Sep 2019)*

- Here I got to learn how to make a responsive website using Python, Angular JS, HTML and CSS. Also got the chance to learn basic knowledge of being a developer, like using git.

Secondary school, Concord Boys High School *(Finished 2017)*

- I finished my secondary education, as mentioned above and managed to score a grade of C+.
